Measurement #3

For Exhaust/Utility Cutouts

Height of Exhaust or Obstacle to the Ground
Center of Exhaust or Obstacle to Center of Hitch

Obstacle:

☐ Driver Side

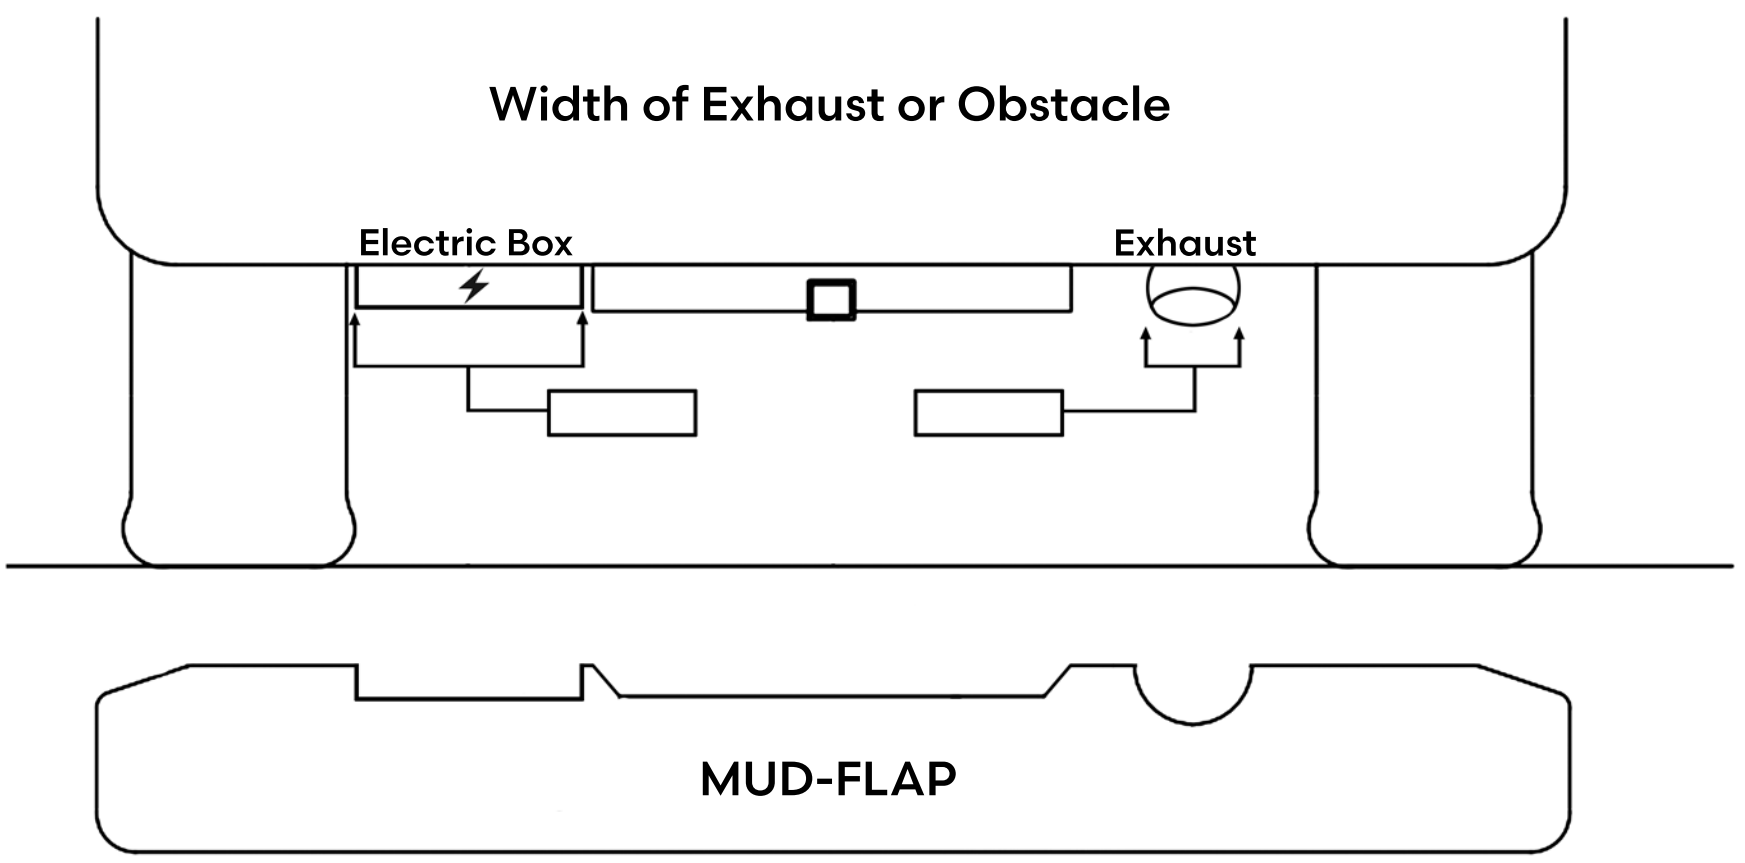

☐ Passenger Side

Exhaust:

☐ Driver Side

☐ Passenger Side

Width of Exhaust or Obstacle

Be aware of other obstacles that may hit the mud flap,
such as exhaust, electrical plugs or air line connections.
We will need these measurements to add cut-outs around the obstacles.
The mud flap should not hang behind the exhaust pipe as this will damage the flap.
